Task	Time	Observations
1	14:45	Thunderbird > Add-ons
2	14:47	Hates making up passwords > uses a password manager
	14:48	It doesn't show if the password has enough characters already (just a progress bar about the quality of the password)
	14:48	Need a button to see what she types
4	14:53	Downloads the public key > saves it and imports it to the Key Manager
5	14:56	Strange pop-up
	14:56	Found so many results
6	14:58	Automatic encryption
	14:58	Why enter passphrase now? Did I do something wrong?
	14:59	Enigmail automatically decrypts the email > even if you don't want it
7	14:59	Reenter passphrase > annoying
	15:00	Confusing not-trustworthy but correct signature
8	15:01	Why does it always sends an attachment? (public key)
Interview	15:03	Doesn't like Thunderbird and Enigmail too
